### *Energy Storage for the Alpine Space*

## 3<sup>rd</sup> AlpStore Technical Symposium

**Project AlpStore will be presented at *evolution:m 2014*, an excellent chance to show progresses and results of the project**

The Technical Symposium takes place at Bregenz, Austria, June 3<sup>rd</sup>, 2014

29/05/2014 Electrical mobility is once more the focus of the second *evolution:m*, the future congress for mobility. It not only looks at the subject from a technical point of view but also as an opportunity for new systems approaches, new mobility concepts, networking different functions and changed usage behaviour. If electrical mobility is to bring about a paradigm shift, it will need new concepts of a technical nature as well as in terms of services and reward systems. This requires an interdisciplinary approach by all decision-makers from the automobile industry, public transport, energy management, infrastructure and systems services, transport planning, politics and the communications sector. A further aspect to be highlighted at this second successful congress is that of energy storage. On the one hand, this would be short-term storage in the form of integrated batteries in electric vehicles and on the other long-term sources in the form of stationary solutions.

During the conference many experts will explain the current stage of energy and mobility technologies, especially related to electric vehicles, second use batteries, networks, e-mobility. The audience will be also informed, besides AlpStore, about other projects: ELMOs, VLOTTE EMOTIONS, Meet & Charge, Smart City Rheintal. The day will end with a panel discussion.

The congress will be moderated by Ludwig Karg (CEO of *B.A.U.M. Consult*, leader partner of the AlpStore Project).

The e-mobility rally WAVE (World Advanced Vehicle Expedition) [www.wavetrophy.com/en/](http://www.wavetrophy.com/en/) will also make a step-over at the Technical Symposium in Bregenz.

*Note for the editor:*

*AlpStore is supported by the Alpine Space Programme 2007-2013, which is part of the "European Territorial Cooperation" (Objective 3 of the Regional Policy 2007-2013). Together with 13 other programmes it strives for transnational cooperation in and between the European Regions. The programme's overall aim is to increase the competitiveness and the attractiveness of the cooperation area in a sustainable way. Thus it supports transnational projects in the Alpine area fostering territorial development and cohesion. These projects involve key actors of the cooperation area and develop joint actions for shared solutions on specific Alpine issues as laid down in the programme "priorities": competitiveness and attractiveness; accessibility and connectivity; environment and risk prevention. To know more, please visit: [www.alpine-space.eu](http://www.alpine-space.eu)*

The event has been organised by *illwerke vkw*.
