

ALP STORE

Energy Storage for the Alpine Space

PRESS RELEASE

**Euroimpresa, in collaboration with the companies of Lombardy Energy Cleantech Cluster, organizes
“PLANNING ENERGY SAVING IN PUBLIC ADMINISTRATION”
Sala Ceccarelli in Tecnocity, Via XX Settembre 34, Legnano
Wednesday 2nd July 2014, 10.00 a.m. – 13.30 p.m.**

The role of energy management in Public Administration is acquiring an increasingly complex and rich profile, given the dual role of consumer and local decision maker.

There are many elements related to the choices for energy saving and it could be difficult for an administrator to be able to orient himself.

The meeting organized by Euroimpresa in collaboration with companies of Lombardy Energy Cleantech Cluster is aimed to match up local public administrations and companies that deal in energy saving.

The cluster companies have the purpose of creating a network in order to address the challenges of the market in a synergistic way, including new technologies, Italian and international regulations on the topic.

An opportunity for Local Public Administrators to confront themselves with interlocutors, who belong to the energy cluster, which may represent a valid support to guide choices on the theme of energy saving.

The event is promoted within the European project AlpStore "Strategies to use a variety of mobile and stationary storages to allow for extended accessibility and the integration of renewable energies" whose main objective is to analyze and evaluate the impact of stationary energy storage systems (such as batteries, thermal storage, etc.) on the energy system, giving particular attention to the possibility of integrating more efficiently the energy produced from renewable sources on the network.

During the day the results of the pilot action effected in Tecnocity with the project Alpstore will be presented.

Note for the editor:

AlpStore is supported by the Alpine Space Programme 2007-2013, which is part of the "European Territorial Cooperation" (Objective 3 of the Regional Policy 2007-2013). Together with 13 other programmes it strives for transnational cooperation in and between the European Regions. The programme's overall aim is to increase the competitiveness and the attractiveness of the cooperation area in a sustainable way. Thus it supports transnational projects in the Alpine area fostering territorial development and cohesion. These projects involve key actors of the cooperation area and develop joint actions for shared solutions on specific Alpine issues as laid down in the programme "priorities": competitiveness and attractiveness; accessibility and connectivity; environment and risk prevention.
